Overview

What is a Data Centre?

- Facilities that house servers and network equipment, supporting clients' critical business operations
- Requires technical expertise and intricate understanding of the industry and clients' needs

Internet Connectivity

Physical telecommunication cables brought into the data centre to allow direct connectivity

Uninterruptible Power System (UPS) / Generators

To provide continuous power supply in the event of outages from local power grids

Cooling equipment

To maintain a facility's temperature, typically at 18 - 24 degrees Celsius

Fire suppression and building monitoring systems

Hardware and associated software to monitor and control elements such as the facility's temperature, humidity, security and operations

Client's servers

Enclosures to house client's computer servers and connect to power and cooling sources

Raised flooring

An elevated structural floor to allow the passage of mechanical and electrical services

Outlook

Resilient Asset Class that Supports the Digital Economy

- COVID-19 an added boost to a market that was already developing rapidly: Enterprise spending on cloud infrastructure services increased by 33% y-o-y to almost US\$33b in 3Q 2020¹
 - Changes in working practices accelerated shift to hosted and cloud collaboration solutions¹
 - Stricter border controls and data sovereignty regulations accelerated move to keep data in-country²

APAC data centre spending to surpass US\$30b by 2023 to account for >30% of global market²

Global colocation market expected to grow by 15%² in 2020

>70% of all hyperscale data centers are located in facilities that are leased or owned by partners¹

European data centre market to grow by >40% to over US\$20b by 2023, despite limited new supply²

Enterprise spending on cloud infrastructure expected to grow by 22%² CAGR over next 5 years

Global mobile data traffic expected to increase by 31% annually from 2019 to 2025³

Stable Outlook Supported by Sound Industry Fundamentals

- Demand for data centre space underpinned by increasing cloud adoption, rapid digital transformation, data centre outsourcing and data sovereignty regulations

Growing data requirements

- Strong growth in data creation, usage and requirements expected to continue.
- Driven by Internet of Things, and new technologies like 5G, Artificial Intelligence, Virtual Reality, driverless vehicles.

Mission-critical infrastructure

- Data centre facilities support clients' critical day-to-day business operations, and/or meet regulatory and compliance requirements.

Substantial relocation costs

- The need to replicate costly and high specifications set of IT services and data centre equipment for seamless relocation.
- Risk of downtime and business disruptions.

Long lead time to develop data centres

- Technical expertise and intricate understanding of industry and clients' needs are required.
- Anchor clients or significant pre-let, on top of the necessary power, cooling and network connectivity, have to be secured before development.

Scarcity of attractive sites

- Limited suitable sites with specialised data centre requirements:
 - Access to sufficient power and fibre connectivity
 - Minimal risk factors such as flooding or natural disasters

Well-positioned for Growth

- The Manager will continue to strengthen Keppel DC REIT's presence and position it to capitalise growth opportunities in the data centre industry

Investment merits

- ✓ Fast-growing asset class
- ✓ Resilient income stream
- ✓ Focused investment strategy
- ✓ Prudent capital management
