# **Overview**

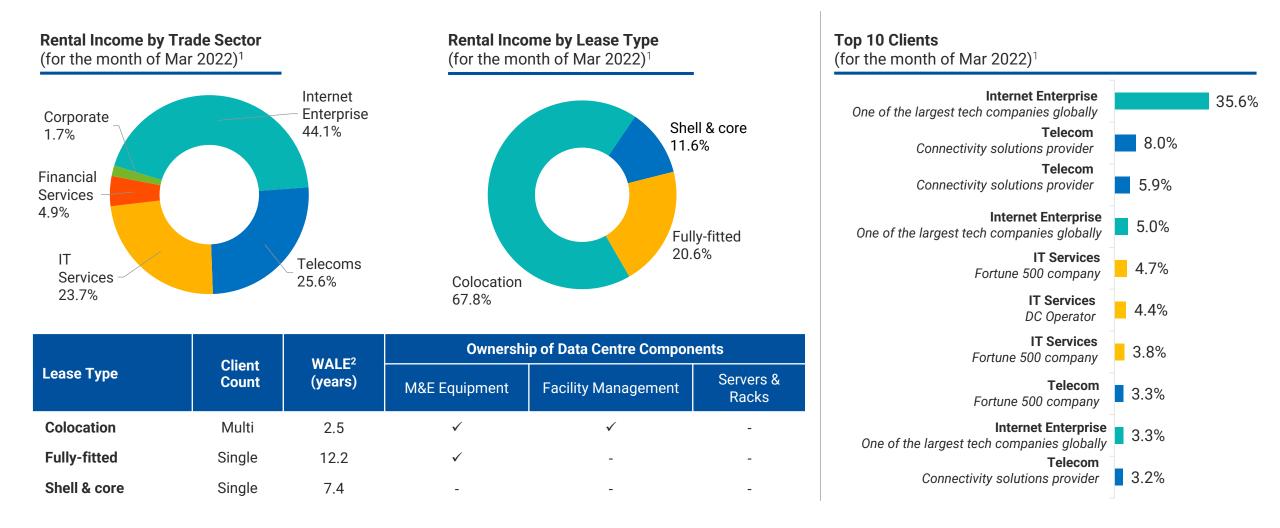

### **Focused on Growing Data Centre Portfolio**

## **Diversified and Resilient Client Base**

# 1Q 2022 Operational Updates

## **Key Highlights for 1Q 2022**

### Higher distributable income and DPU

Distributable income and DPU<sup>1</sup> for 1Q 2022 increased by 5.9% and 0.2% y-o-y respectively, mainly due to
recent data centre acquisitions and investment in debt securities, partially offset by lower contributions
from Singapore assets as a result of provisions made for a client payment under dispute at KDC SGP 1<sup>2</sup>
and higher electricity costs

### High income visibility from portfolio of quality data centres

• Established track record with high portfolio occupancy of 98.7% and long WALE of 7.7 years<sup>3</sup>

### Healthy balance sheet to support growth plans

- Healthy aggregate leverage of 36.1%<sup>4</sup> as at 31 Mar 2022
- High interest coverage ratio of 10.0 times and low average cost of debt of 1.8%<sup>5</sup> as at 31 Mar 2022

### **Commitment to value creation**

- Continued focus on data centres through strategic acquisitions
- Integration of environmental, social and governance factors into our strategy and operations

- 1. Distributable Income includes Capex Reserves. Keppel DC REIT declares distributions on a half-yearly basis. No distribution has been declared for the quarter ended 31 March 2022.
- 2. Provisions were made by Keppel DC Singapore 1 Ltd. 1 out of prudence and without concession to the strength of its claim because this amounts to an ageing receivable.
- 3. By leased area. WALE by rental income was 5.1 years as a higher proportion of rental income is from colocation assets, which typically have shorter lease periods.

5. Including amortisation of upfront debt financing costs and excluding lease charges.

<sup>4.</sup> Computed based on gross borrowings and deferred payment as a percentage of deposited properties, both of which do not consider the lease liabilities pertaining to land rent commitments and options. Aggregate leverage as at 31 Dec 2021 was 34.6%.

London Data Centre is fully leased till 2039: Triple-net lease on a shell and core basis to a leading telecommunications company

### **Acquired Second Data Centre in London**

Strengthen foothold in London, a top global data centre hub: New data centre demand in London is estimated to grow at a CAGR of 14.2% between 2020 and 2024<sup>1</sup>

 $\star$ 

**Well located:** Bracknell is a thriving commercial centre in the Thames Valley which is a region dubbed as United Kingdom's Silicon Valley.

## **Well-spread Debt Maturity Profile**

• Obtained a revolving credit facility of GBP70m for 6 years in 1Q 2022

Debt Maturity Profile (as at 31 Mar 2022)

■ SGD ■ AUD ■ GBP ■ EUR ■ RMB

As at 31 Mar 2022	
Available Facilities	~\$563.6m of undrawn credit facilities
Aggregate Leverage <sup>1</sup>	36.1%
Average Cost of Debt <sup>2</sup>	1.8%
Weighted Average Debt Tenor	3.8 years
Interest Coverage Ratio (ICR)	10.0 times

## **Prudent Capital Management**

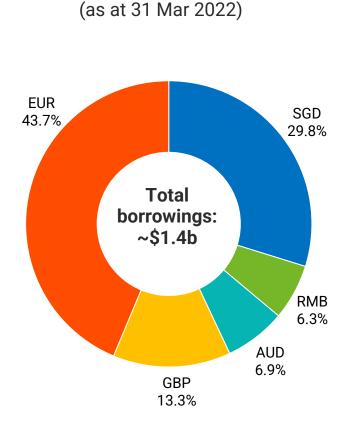

**Debt currency breakdown** 

### Managing interest rate exposure

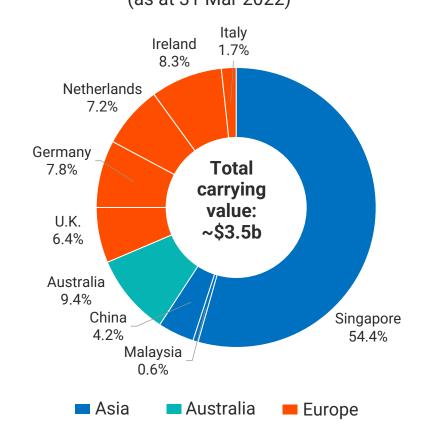

- 76% of loans hedged through floating-to-fixed interest rate swaps, with the remaining unhedged borrowings in EUR
  - Weighted average hedge tenor is 3.4 years
  - With the 76% hedge in place, a 100bps rise in the interest rates would only affect the remaining 24% unhedged borrowings. A 100 bps change would have an approximately 1% impact to 1Q 2022's DPU on a pro forma basis

### Mitigating impact of currency fluctuations

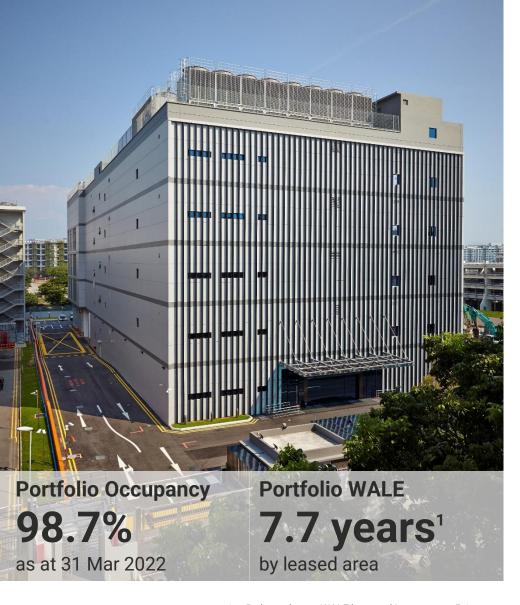

- Forecasted foreign-sourced distributions have been substantially hedged till 2H 2023 with foreign currency forward contracts
- Adopted natural hedging as much as possible by borrowing in currencies that match the corresponding investments

#### Investment properties breakdown<sup>1</sup> (as at 31 Mar 2022)

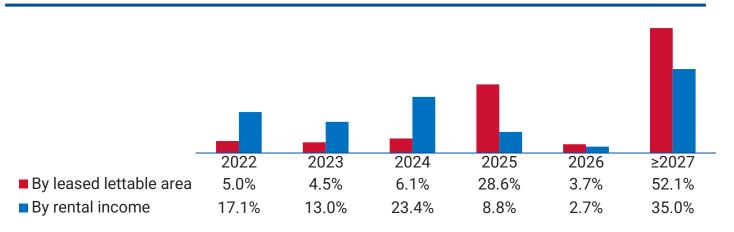

## **Proactive Portfolio Management**

- Strengthened portfolio and foothold in Europe with the completion of the acquisition of London Data Centre
- Proactive leasing efforts resulted in new, renewal and expansion leases secured at Dublin, Malaysia and the Netherlands
- Enhanced portfolio metrics, with an increase in portfolio WALE of 7.7 years (from 7.5 years as at 31 Dec 2021 and higher occupancy of 98.7% (from 98.3% as at 31 Dec 2021)<sup>2</sup>
- Active review of portfolio exposure to identify and manage any potential risks that may arise from the geopolitical environment and rising costs (e.g. utilities<sup>3</sup> and inflation)
- On a portfolio basis, the built in income and rental escalations based on Consumer Price Index or similar indexation, or fixed rate mechanisms will serve to mitigate the inflationary impact<sup>4</sup>

### Well-Spread Lease Expiry Profile (as at 31 Mar 2022)

1. By leased area. WALE by rental income was 5.1 years as a higher proportion of rental income is from colocation assets, which typically have shorter lease periods.

Not adjusted for the ongoing litigation with DXC Technology Services Singapore Pte. Ltd as the existing lease at Keppel DC Singapore 1 is still in place and effective.

Based on existing contracts in place, a further 10% increase in electricity tariffs from 1Q2022 would have an impact of approximately 0.009 cents per Unit to 1Q2022 DPU on a pro forma basis.

4. The WALE by rental income of contracts/leases with no escalations is approximately 2 years.
