## **Proactive Management of Interest Rates and Forex**

#### Majority of loans hedged through floating-tofixed interest rate swaps

- With the 76% hedge in place, a 100bps rise in the interest rates would only affect the remaining 24% unhedged borrowings. A 100bps increase would have an ~1.6%<sup>1</sup> impact to 2Q 2022's DPU on a pro forma basis
- Remaining unhedged borrowings largely in EUR
- Substantially hedged forecast foreign-sourced distributions till 2H 2023 with foreign currency forward contracts
- Adopted natural hedging by borrowing in currencies that match the corresponding investments to the extent possible

🗖 Asia 🛛 🗖 Australia 📁 Europe

#### Keppel DC REIT 1. This impact does not include any new or refinanced borrowings which the REIT may have. 2. Based on 100% carrying value as at 30 Jun 2022 without taking into consideration the lease liabilities pertaining to the land rent options.
