1Q 2023 Key Highlights

Resilient financial performance underpinned by quality portfolio

- Distributable income and DPU for 1Q 2023 increased by 4.1% and 3.0% year-on-year respectively, mainly due to contributions from acquisitions and proactive asset management
- Majority of rental income is derived from clients with investment grade or equivalent credit profiles
- Obtained approvals for the NetCo Bonds to be qualified as Qualifying Project Debt Securities (QPDS)

Proactive management of borrowing costs and impact of currency fluctuations

- Bulk of debt expiring from 2026 and beyond. By Apr 2023, completed the refinancing of all loans due in 2023
- Interest rates exposures are mitigated with 73% of loans fixed
- Forecast foreign sourced distributions have been substantially hedged till end 2023. In Apr 2023, progressively hedged part of the forecast foreign sourced distributions till end Jun 2024

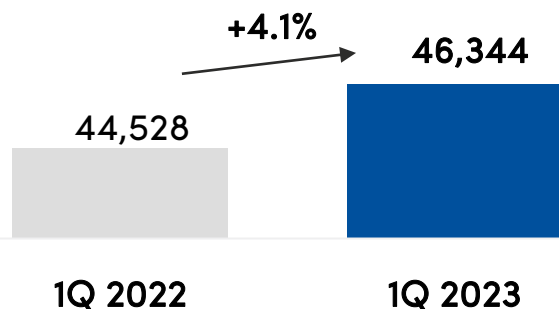

Continued pursuit of growth opportunities

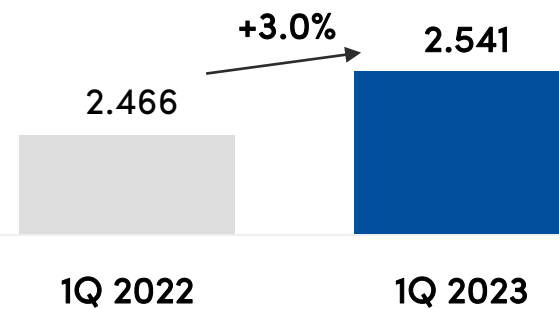

- Disciplined pursuit of data centre acquisition opportunities
- Continued geographical diversification for growth and income resilience

Higher Distributable Income and DPU

Distributable Income (\$'000)¹

Distribution Per Unit (cents)²

1Q 2023 vs 1Q 2022

- Higher distributable income and DPU were mainly due to:
 - Increase in gross revenue from the acquisitions of Guangdong Data Centre 2 & building shell of Guangdong Data Centre 3;
 - Completed asset enhancement initiatives (AEI), renewals and income escalations; and
 - Tax savings³ from approvals obtained for the NetCo Bonds to be qualified as QPDS

These were partially offset by :

- Net lower contributions from some of the Singapore colocation assets arising from higher facilities expenses including electricity costs
- Higher finance costs from the refinanced loans, as well as unhedged loans
- Depreciation of foreign currencies against SGD
- Higher property expenses mainly from the Dublin assets following AEI completion
- Higher finance income mainly due to coupon income from Guangdong Data Centre 3

(\$'000)	1Q 2023	1Q 2022	% Change
Gross Revenue	70,403	66,104	+6.5
Property Expenses	(6,515)	(5,975)	+9.0
Net Property Income	63,888	60,129	+6.3

Demand Underpinned by Strong Market Fundamentals

- Data centre demand continues to be driven by long-term trends including adoption of cloud computing, digital transformation initiatives; and artificial intelligence (AI) & machine learning (e.g. generative AI including ChatGPT)

- Worldwide cloud market grew by US\$47b in 2022 (2021: grew by US\$49b); Synergy Research forecasts continued strong growth of worldwide cloud market in the coming years¹

- Hyperscalers continued to see growth in their cloud businesses, with US hyperscalers reporting ~20% to 32% growth rates in 2022

- Key markets are facing power constraints, and ready-for-service timelines may be slowed by supply chain issues and community resistance; emergence of submarkets around existing data centre corridors^{2,3}

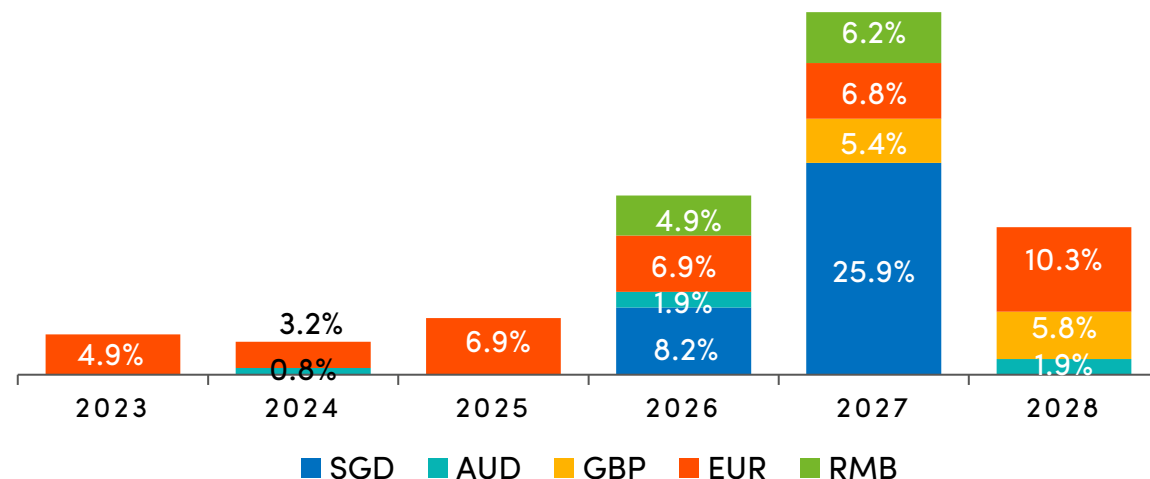

Capital Management

Favourable Debt Profile

- Debt is diversified across five currencies, with the bulk of debt expiring from 2026 and beyond. By Apr 2023, completed the refinancing of all loans due in 2023
- Healthy aggregate leverage provides debt headroom for growth opportunities

Debt Maturity Profile

1. Computed based on gross borrowings and deferred payment as a percentage of deposited properties, both of which do not consider the lease liabilities pertaining to land rent options and an extension offer. As at 31 Mar 2023, the deposited properties was \$3,977.8m (31 Dec 2022: \$4,051.7m).
2. Including amortisation of upfront debt financing costs and excluding lease charges.
3. In Apr 2023, the REIT has issued notes to refinance the remaining notes due in 2023. Including this issuance, the weighted average debt tenor would be 4.1 years as at 31 Mar 2023 on a pro forma basis.
4. Based on closing price of \$2.06 as at 31 Mar 2023 and \$1.77 as at 31 Dec 2022.

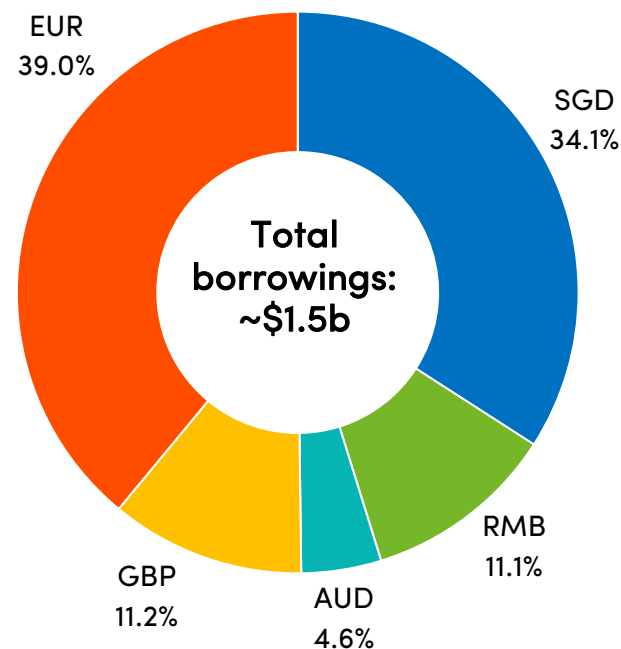

Prudent Management of Borrowing Costs and Impact of Currency Fluctuations

Majority of loans fixed through interest rate swaps

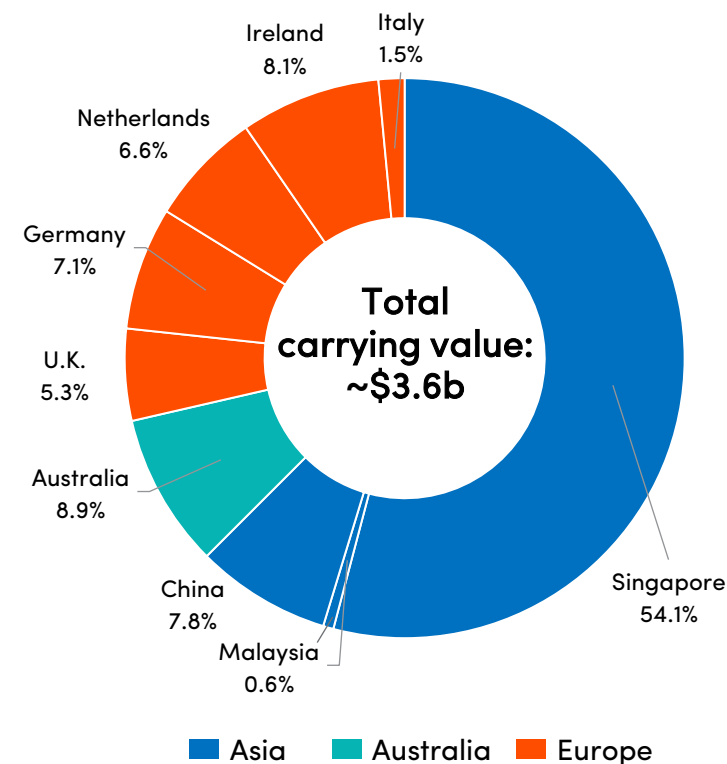

- With 73% of debt fixed, an increase in interest rates would only affect the remaining 27% unhedged borrowings. A 100bps increase would have a ~2.2%¹ impact to 1Q 2023's DPU on a pro forma basis
- Forecast foreign sourced distributions have been substantially hedged till end 2023. In Apr 2023, progressively hedged part of the forecast foreign sourced distributions till end Jun 2024
- Adopted natural hedging by borrowing in currencies that match the corresponding investments
